

# Custom Windshield/Handle Bar Bags

By Kent Did It

How about a bag that holds your particular ‘stuff’ neatly with a classy, custom look? I can make a personalized bag to your specs, with compartments or pockets to hold your weapon (internal holster), cell phone, eye drops, medication, shades or whatever. Don’t throw everything into an open bag, keep things neat and where they belong. Get creative, add a power outlet to charge your phone or GPS while you ride!

The bag shown is made of Alligator leather with a soft flannel lining. You may also choose from Ostrich, un-dyed Cowhide or distressed Leather in black, brown, tan or oxblood. Tell me what pockets you need and how big you want the bag. The one in the pics is a roomy 9” wide, 4” deep and 2” front to rear. It has a Velcro clasp on the flap and the straps Velcro together inside the bag for a clean outer appearance.

Choose from High Rise or Low Rise (shown) strap placement. You can also accessorize your bag with conchos or clasps like the examples below.

Drop me a note and let's talk about a custom bag for your bike. I'll try not to kill your bank account too bad. You'll be glad you did!
